

The **EASIEST** Way to Grind, No Matter What Your Size

Get in the fast lane. Increase your throughput of top-quality parts. Mitsubishi has a full-line of machines to make grinding easier for users from small-lot job shops to high-production facilities. Mitsubishi grinders are designed to be the easiest to program, operate and maintain. And, all our cylindrical grinders offer the industry-leading performance and rugged stability you expect from Mitsubishi.

Mitsubishi offers the easiest-to-use, most versatile grinding machines in the industry:

- Large selection of feature-loaded models to meet a wide variety of needs.
- Teach & Play control – rotate handwheels to cut the first part, then hit playback. Ideal for small-lot, job shop applications.
- Intuitive graphical data input makes programming fast and simple.
- On-screen technical information for rapid diagnosis and troubleshooting.
